Оплата за отклики (не за клики как в Indeed.com)

- Канада (за отклик),
- Турция (за просмотр отклика),
- Румыния (за принятое приглашение на интервью)

1. Pay-Per-Applicant

Manage costs by only paying when someone applies.

2. Gain Greater Reach

The Applify Network approach puts your posting in front of more candidates.

3. Easy ROI Tracking

You always know what you're paying for and what you get as a result.

4. No Contracts

You are never locked into a contractual commitment, pay-per-use only.

WHY PAY PER APPLICANT?

The Workopolis story – what about our core “cost per post” offering?

Question: “Are you concerned about cannibalization?”

Answer: **No!**

✓ Currently have 105 clients using the Applify solution representing 2,000+ actively sponsored jobs

Peer opinions are part of the everyday decision making process Before buying anything ... Before travelling Before visiting.

Why not before applying for a job?

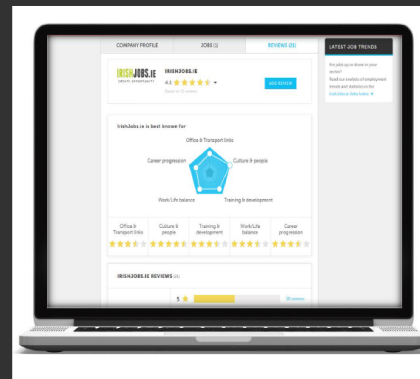

Companies are rated on

- Culture & People
- Work/Life Balance
- Training & Development
- Career Progression
- Office and Transport

- The Best Bits
- Areas for Improvement

- Capturing salary data for Phase 2

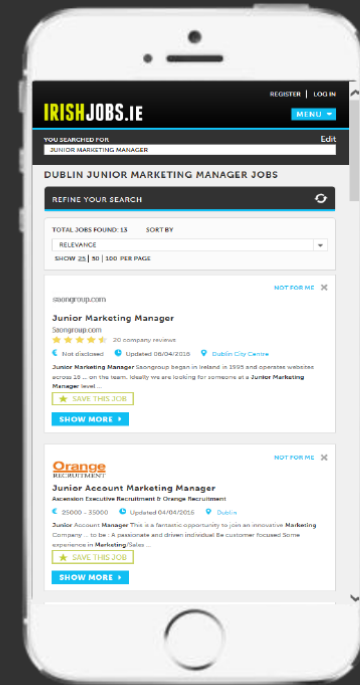

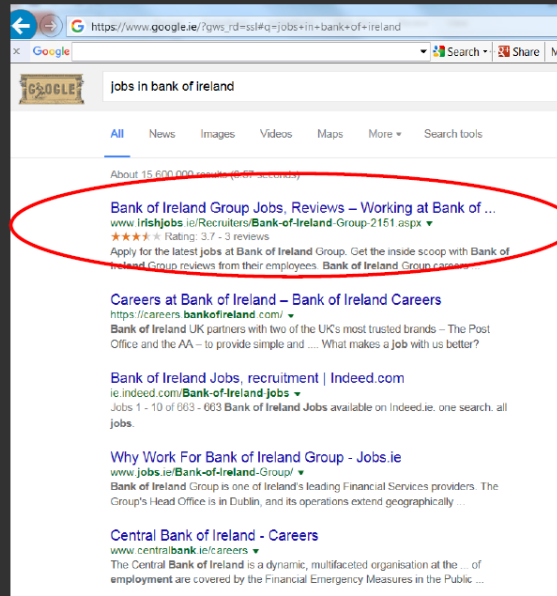

Star ratings are surfaced on

- Company profiles
- Search results >3 stars
- Jobs descriptions >3 stars

What have we learned?

- Company reviews are SEO friendly. This taps into the growing trend for jobseekers to search for jobs by company name

What have we learned?

- Some customers are scared of reviews, but most see the value of better matched candidates and greater visibility for their profile

Visits to company profile and review pages by number of reviews
(March 2016)

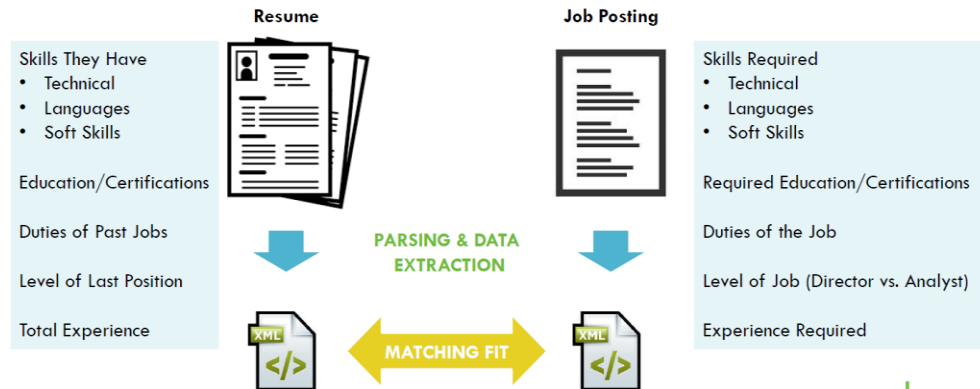

Review content is highly effective in driving new users to company pages. As review content grows, we see an increase in visitors to company review and profile pages.

DATA SCIENCE – работа с Big Data, для мэтчинга кандидатов и вакансий

Также известно как Machine Learning, Artificial Intelligence or Big Data, Data Science

RESUME AND JOB POST ARE DECOMPOSED TO UNDERSTAND THE FIT ON HARD SKILLS

Data Scientist

LOBLAW COMPANIES LIMITED, Toronto, ON, CANADA

Loblaws Digital is the team responsible for building and operating e-commerce businesses for Canada's largest and most successful retailer. So far we've created leading responsive e-commerce experiences for Loblaws Click & Collect (shop.loblaws.ca), Shoppers Drug Mart beauty/BOUTIQUE (beautyboutique.ca), and Joe Fresh (joefresh.com), with much more to come.

We are based in downtown Toronto and operate like a start-up with extensive resources. We are an entrepreneurial, fast-paced, collaborate, and fun team working to transform the way Canadians shop.

To achieve this goal, we are looking for talented and passionate individuals who want to solve challenging problems and make a significant and lasting impact on Canadians.

A successful candidate must have hands-on experience working with Hadoop Big Data ecosystem (HDFS, Map/Reduce, Hive, Hbase, Sqoop, etc.), with a deep understanding of data mining and analytical and quantitative concepts, and machine learning techniques.

Duties And Responsibilities

- . Research innovative data solutions and solve real market problems
- . Develop analytical approaches to meet business requirements
- . Continue to implement data pipeline to ingest, clean, aggregate, and integrate data from various data sources
- . Work with distributed computing tools (HDFS, Map/Reduce, Hive, Hbase, Sqoop, etc.)
- . Support business decisions with ad hoc analysis as needed, and communicate findings to senior management
- . Work with the Technology team in delivering Data Science projects into production

Accommodation is available upon request for applicants and colleagues with disabilities.

Job Qualifications

- . Degree in a quantitative discipline such as Computer Engineering/Science, Statistics, Machine Learning, Applied Math, or equivalent work experience. Masters/PhD preferred.
- . Strong understanding of big data concepts and hands-on experience in working with Hadoop, MapReduce, Hive, Hbase and related big data technologies
- . Strong knowledge/experience using machine learning tools and algorithms
- . Proficiency with Java, SQL, and python
- . Creative problem solver, resourceful in getting things done, and productive working independently or collaboratively
- . Strong passion for analytics and data mining to drive business decisions
- . Ability to communicate complex quantitative analysis in a clear, precise, and actionable manner

Here are just some of the things Loblaws colleagues enjoy:

- . 10% Colleague Discount Program on eligible products sold at Loblaws stores.
- . Ongoing career development through in-house training programs, tuition assistance and support for

Summary of This Position

Skills

- ✓ Data science and big-data skills (Hadoop ecosystem)
- ✓ Proficiency with Java, SQL and Python
- ✓ Problem solving and teamwork spirit
- ✓ Research skills

Work Experience

- ✓ None

Education

- ✓ Degrees in Math, Statistics or Computer Science; Masters or Ph.D. preferred

AVP, Data Scientist

SUN LIFE FINANCIAL, Toronto, ON, CANADA

Job Description

Sun Life Financial is looking to hire an advanced and experienced Data Scientist who has deep knowledge and expertise in both supervised and unsupervised predictive analytics algorithms with the ability to apply these skills to solve business problems. Superior quantitative, technical and communication skills are needed to be successful in interacting deeply with business units as well as other professionals in the I/T and the Insurance Research Lab. This position reports directly to the Global Head of Reinsurance and Insurance Risk & Research.

This role will focus on modeling complex problems, discovering insights and identifying opportunities through the use of statistical, algorithmic, mining and visualization techniques.

Additional responsibilities of the role will include:

Modelling

- Develops innovative and effective approaches to solve the business unit's analytics problems and communicates results and methodologies.
- Renowned expertise in the vast catalogue of industry data models and approaches and can recommend appropriate approach based on the business problem.
- Works in iterative processes and validates findings.
- Develops experimental design approaches to validate finding or test hypotheses.
- Validates analysis using scenario modeling.
- Identifies/creates the appropriate algorithm to discover patterns.

Data Preparation and Sourcing

- Identifies data relevance, availability and integrity, including internal and external data sources, leveraging new data collection processes.
- Collaborates with subject matter experts to select the relevant sources or information.
- Makes strategic recommendations on data collection, integration and retention requirements incorporating business requirements and knowledge of best practices.

Data Understanding

- Leads discovery processes with stakeholders to identify the business requirements and the expected outcome.
- Using an iterative and dynamic process, suggests other products and queries of interest to the business unit.
- Models and frames business scenarios that are meaningful and which impact on critical business unit processes and/or decisions.

Evaluation and Deployment

- Defines the validity of the information, how long the information is meaningful, and what other information it is related to.
- Provides metrics for the overall project to show improvements.
- Presents and depicts the rationale of their findings in easy to understand terms for the business.
- Educates the organization both from a data and the business perspectives on new approaches, such as testing hypothesis and statistical validation of results. Helps the organization understand the principles and the math behind the process to drive organizational buy in.

Summary of This Position

Skills

- Data science and big-data skills
- Programming skills in Java framework
- Data modeling using SAS, R or Matlab
- Actuarial knowledge preferred
- Research skills

Work Experience

- 5+ years of experience of Analytics

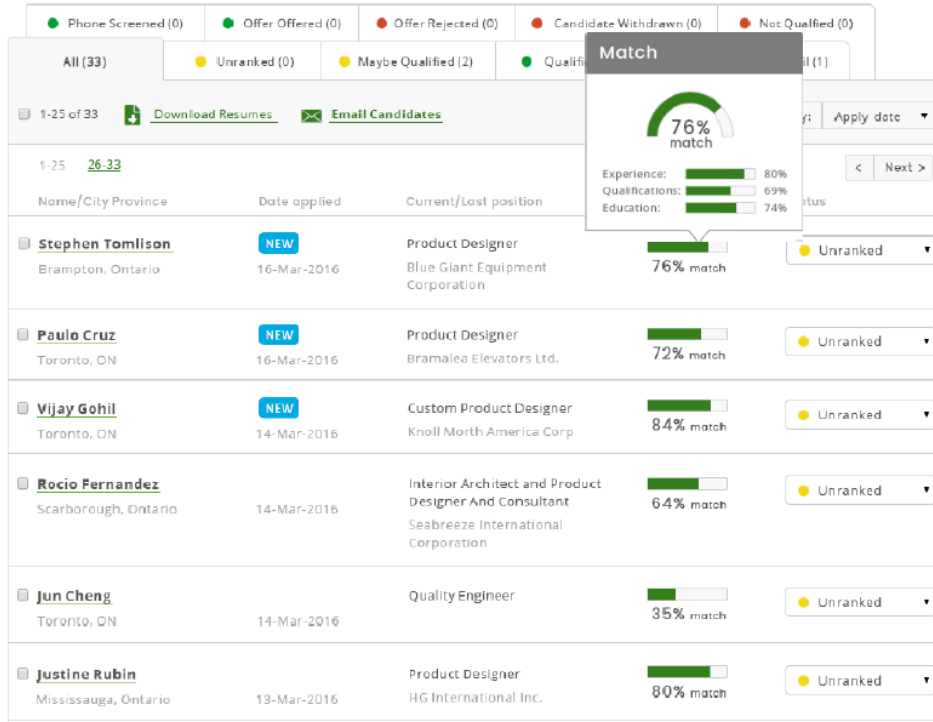

Education

- Masters in Math, Statistics or Computer Science; Ph.D. degree preferred

MATCHING SAVES EMPLOYER SCREENING TIME

Applicants for Product Designer

Features:

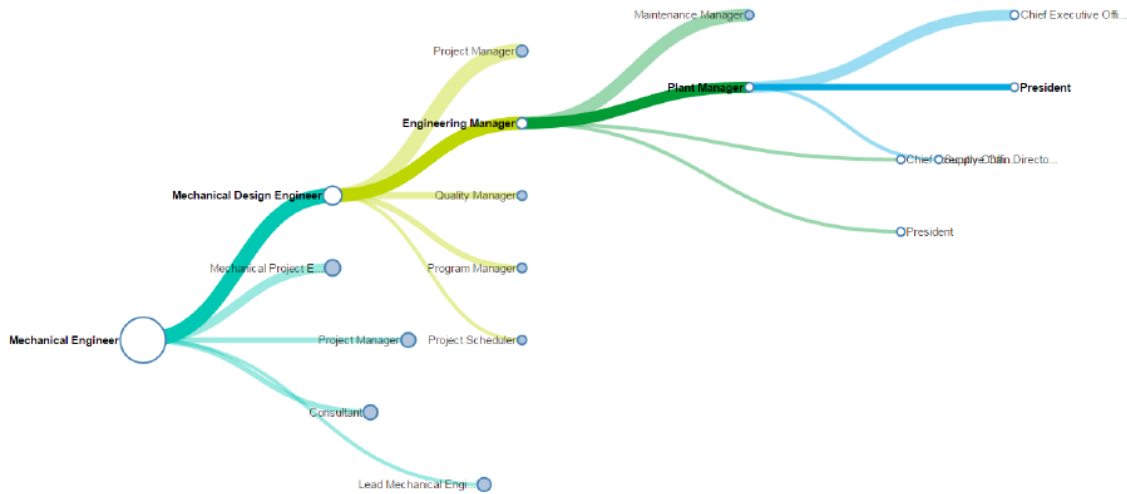

- The platform assesses the 'fit' between a candidate and a job
- We sort the pile of resumes, ensuring that recruiters only have to review the top 30%
- Resume view provides greater candidate insight, e.g. detailed skills assessment

Application:

- Encourage small and medium employers to use our tools for recruiting, instead of email apply
 - Provides critical insights into usage rates and recruiting behaviour
 - Opportunities for cross-sell and upsell
- Provide value-added functionality for our subscription bundles, thus driving renewal rates

EXPLORE REAL-WORLD CAREER PATHS

Features:

- Based on millions of resumes, parsed for education, job title and tenure
- Shows most possible career paths and time to attain next promotion

Application:

- Interactive tool aimed at younger job seekers who are making career and education choices
- Useful for guidance counselors or educational institutions promoting their programs
- Drives seeker engagement, including repeat visits, shares, careers and job searches
